ON-SITE FURNITURE REFINISHING

Fresh Air Finishers Can Save You Time and Money

Wall panels the wrong color? Save thousands by having Fresh Air Finishers fix it! We can adjust the color on individual panels onsite.

A New Look!

The panel in the middle was too light. Fresh Air Finishers mixed a custom toner to apply over the existing finish to match the color of the panels on the left and right. The client was happy with the results and the work was done onsite with no obnoxious fumes and minimal disruption to people in the workplace.

Whatever your onsite finishing or touch-up needs, Fresh Air Finishers has the answer. We touch-up doors, woodwork, furniture and many other wood or man-made materials. Please email us with pictures and specifics of your project.
